

PROJECT 4

We Are On The Move

Goal

Children actively explore the science of wheels while using a wagon and tricycle to move from place to place.

What

In We are on the Move, children discover how to safely move with their legs, and push, ride, and steer wheels with their bodies.

Why

Children are naturally interested in riding wheeled toys to move and pretend they are driving their own vehicle.

Community

Children investigate wheeled toys in their play spaces, learn safety rules, and work together to move objects.

Family

Family members take a real and a pretend ride on a tricycle, and pull and push familiar objects like a wagon.
